ZAMI ERGO CHAIR

Protected / patented model

ZAMI
THE SITTING SOLUTION

Smart ergonomic stool against back problems

- Due to the double curved (double parabolic) seat shape, you automatically stretch your back and always vary sitting posture. This results in a better general body posture.
- The ZAMI makes you aware of your attitude. You correct immediately a bad attitude.
- Spine maintains its natural protective S-curve
- Experience less pressure on the lower back, improved breathing, freedom of movement of the head and neck and increase of back and trunk muscles.
- You can easily alternate sitting postures that be protective of your back: with your knees down or in saddle seat.
- The ZAMI gives your legs all the space to different to assume sitting postures.
- The frame is made of powder-coated aluminum.
- The seat is made of strong pressed beech wood with a filling of high-quality Polyurethan foam RG 65/90 and is covered with real leather (aniline dyed).
- Slim design and a graceful appearance.

ZAMI sitting instruction

On the Zami you take the right back posture exactly as standing.

Vary your sitting position and position of the legs from time to time.

Sit once transversely to the Zami.

- * Double curvature (double parabolic): perfect support for sitting bones.
- * The frame is made of powder-coated aluminum.
- * Leather upholstery (aniline dyed).
- * Active sitting, helps to train trunk, back, and leg muscles.
- * Spine maintains its natural protective s-curve.
