

WHEELBARROWS

SPECIALLY DEVELOPED FOR THE CONSTRUCTION, GIVEN THE STRICTER

"The TORO® is a replacement for the traditional wheelbarrow. Trundle is lifting!

The Health and Safety Department (Arbo) demands that up to 25 kg may be lifted. The total weight of a wheelbarrow allowed to use (refer to the main trundle) is up to 60kg. (Government Gazette 14 May 2012)

This is from September 1. strictness by the labor inspectorate. With the TORO® this is almost past: The TORO® trundle is no longer necessary, but the load is pushed. The TORO® has for every action and movement of cargo such as turning, and tipping the appropriate handles available.

In addition, because of the improved weight and handle height, even with trundle (For example on a scaffold plank) there is a lower back strain than with the traditional wheelbarrow. The TORO® is equipped with a specially developed brake. Just kicking for securing is easy and secure, the TORO® is then safely stopped.

- * Flat tray
- * Capacity: 90 liter.
- * Upright tilting.
- * Not lift but push.
- * 15% less load by trundle.
- * 50% less tax by pushing.
- * Braked model.
