

# PLASTERER'S STEP aluminium

## Professional aluminium plasterer's step, load capacity 150 kg.

- Completely made of magnesium reinforced aluminium.
- Frame is made of oval tube, light and strong.
- The steps are made of square aluminium tube.
- The square bars are turned 45 ° for more grip.

The square bars are turned with the pointed upwards turned for:

1. more grip.
2. less adhesion of dirt.
3. dirt can be scraped off shoes

- The legs are equipped with foot plates.
